

Jawapan/Answer:
(ii)

149

- (b) Rajah 9.1 menunjukkan lima set kotak putih dan hitam. Sebilangan bola dimasukkan ke dalam kotak putih dan hitam mengikut turutan nombor tertentu.
Diagram 9.1 shows five sets of white and black boxes. A number of balls are put into the white and black boxes according to a certain number sequence.

Kotak Box										
Bilangan bola Number of balls	1	6	5	p	9	24	q	48	17	r

Rajah 9.1
Diagram 9.1

Cari nilai-nilai p , q dan r .
Find the values of p , q and r .
Jawapan/Answer:
 $1, 5, 9, 13, 17, \dots$ $6, 12, 24, 48, 96, \dots$
 $1, 5, 9, q, 17, \dots$ $6, p, 24, 48, r, \dots$
 $p = 12$, $q = 13$, $r = 96$

- (c) Rajah 9.2 menunjukkan tawaran oleh sebuah pusat kecergasan.
Diagram 9.2 shows the offer by a fitness centre.

Pusat Kecergasan Gymmax
Bayaran keahlian bulanan = RM60
Kelas kardio: RM15 per jam
Kelas yoga: RM12 per jam

Gymmax Fitness Centre
Monthly membership fee = RM60
Cardio class: RM15 per hour
Yoga class: RM12 per hour

Rajah 9.2
Diagram 9.2

(i) Pada suatu bulan tertentu, jumlah bayaran untuk Angeline ialah P . Jika dia menyertai x jam kelas kardio dan y jam kelas yoga, ungkapkan P dalam sebutan x dan y .
In a particular month, the total payment for Angeline is P . If she joined x hours of cardio class and y hours of yoga classes, express P in terms of x and y .
Jawapan/Answer:
 $P = 60 + 15x + 12y$

(ii) Dalam bulan Ogos, Angeline perlu membayar RM246. Jika dia menyertai 6 jam kelas kardio, berapa jumlah kelas yoga yang disertai?
In August, Angeline had to pay RM246. If she joined 6 hours of cardio class, how many hours of yoga classes that she joined?
Jawapan/Answer:

$$\begin{aligned} 246 &= 60 + 15(6) + 12y \\ 246 &= 60 + 90 + 12y \\ 12y &= 246 - 150 \\ 12y &= 96 \\ y &= 8 \end{aligned}$$

Angeline menyertai 8 jam kelas yoga.

150

10. (a)

Rajah 10.1
Diagram 10.1

- (i) Bandingkan panjang kedua-dua bas itu dengan mengisi tempat kosong dengan nilai yang betul.
Compare the lengths of both buses by filling in the blanks with the correct values.

[1 mark]

12.7	<	13.5
------	---	------

- (ii) Jadual 10 menunjukkan bilangan penumpang bagi kedua-dua bas yang diwakili oleh x dan y .
Table 10 shows the number of passengers of both buses represented by x and y .

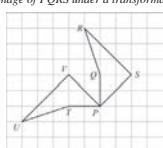

Bas Bus	Bilangan penumpang Number of passengers
K	$0 < x < 40$
L	$0 < y < 35$

Jadual 10
Table 10

Berapakah bilangan maksimum penumpang bagi setiap bas itu?
What is the maximum number of passengers for each bus?
Jawapan/Answer:

$$x = \dots \quad y = \dots$$

- (b) Dalam Rajah 10.2, $PTUV$ ialah imej $PQRS$ di bawah suatu penjelmaan.
In Diagram 10.2, $PTUV$ is the image of $PQRS$ under a transformation.

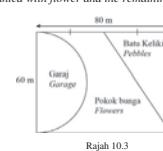

Rajah 10.2
Diagram 10.2

Huraikan selengkapnya penjelmaan itu.
Describe in full the transformation.
Jawapan/Answer:

Putaran 90° lawan arah jam pada pusat P

- (c) Rajah 10.3 menunjukkan sebidang tanah yang berukuran $80 \text{ m} \times 60 \text{ m}$. Kawasan yang berbentuk semibulatan digunakan sebagai garaj. Kawasan yang satu lagi ditamam dengan pokok bunga dan kawasan yang selebihnya dililiti dengan batu kelikir.
Diagram 10.3 shows a piece of land measuring $80 \text{ m} \times 60 \text{ m}$. The semicircle area is used as a garage. Another area is planted with flower and the remaining area is covered with pebbles.

Rajah 10.3
Diagram 10.3

(i) Apakah pecahan bagi luas kawasan yang dililiti dengan batu kelikir daripada luas seluruh tanah itu? Nyatakan jawapan dalam bentuk termudah.
What is the fraction of the area covered with pebbles out of the area of the whole land? Give your answer in the simplest form.
Jawapan/Answer:

$$\begin{aligned} \text{Luas kawasan batu kelikir} &= \frac{1}{2} \times 60 \times 40 = 1200 \text{ m}^2 \\ \text{Luas tanah} &= 80 \times 60 = 4800 \text{ m}^2 \end{aligned}$$

$$\text{Pecahan} = \frac{1200}{4800} = \frac{1}{4}$$

(ii) Luas kawasan pokok bunga ialah 2880 m^2 dan luas garaj adalah $\frac{1}{3}$ daripada luas kawasan pokok bunga. Kira pecahan luas garaj daripada luas tanah itu.
The area planted with flower is 2880 m^2 and the area of the garage is $\frac{1}{3}$ of the area planted with flower. Calculate the fraction of the area of the garage out of the area of the land.
Jawapan/Answer:

$$\text{Luas garaj} = \frac{1}{3} \times 2880 = 960 \text{ m}^2$$

$$\text{Pecahan} = \frac{960}{4800} = \frac{1}{5}$$
