

CHAPTER 4: PERIODIC TABLE OF ELEMENTS

Questions

- The following statements are about the elements in Group 17 of the periodic table. For each statement, cross out the incorrect alternative. As the atomic mass of halogens increases,
 - the atomic radius (increases, decreases)
 - the colour of the elements gets (darker, lighter)
 - the melting points (increase, decrease)
 - the reactivity of the elements (decreases, increases)
- The black and white photographic film is made up of grains or crystals of silver compounds. Silver bromide is normally used. How does it function?
